Education

B.Tech in Computer Science & Engineering

Rayat Institute of Engineering & IT | 2015 – 2019

Work Experience

PHP Laravel Developer

N2R Technologies, Noida | Oct 2020 – Present

- Lead end-to-end of websites, CRM systems, and mobile apps using Laravel & React.js.
- Designed and integrated scalable RESTful APIs for multi-role platforms (Admin, Customer, Technician).
- Optimized database performance and backend architecture for high-traffic applications.
- Collaborated in teams to ensure timely delivery and continuous improvement.
- Enhanced UI/UX with responsive design and performance tuning.

Key Projects

Industrial Project Management System

Designed and developed a comprehensive web-based project management system with multi-role access (Admin, Customer) to streamline industrial service operations.

Developed secure, scalable REST APIs to support multi-role interactions for Manager, Technician and Customer. Also integrate API in React Native Apps.

Tech Stack: Laravel, React Native

Link: scel.n2rtech.com

- Built a multi-role (Admin, Customer, Technician) web & mobile app for job tracking.
- Developed real-time scheduling, invoicing, and notifications.
- Integrated APIs with React Native for field technicians, manager, customer.

Worker Scheduling System

Developed secure, scalable REST APIs to support multi-role interactions for Admin, Worker, Client. Also integrate Api in React.js App.

Tech Stack: Laravel, React.js

Link: n2rtech.com/item/worker-schedule

- Created shift management, time-off requests, and role-based scheduling.
- Enabled real-time updates for workers and managers.

Job Portal (bcrew.in)

Developed a job portal platform that connects job seekers with employers, featuring role-based access, job management, and monetized job posting via package subscriptions.

Tech Stack: Laravel, Razorpay (Payment Gateway)

Live: bcrew.in

- Developed job posting, resume search, and subscription-based payments.
- Integrated Razorpay for secure transactions.

Insurance Management

Built a modular Insurance Management System to streamline the customer journey from lead generation to policy renewal, improving operational efficiency and customer retention

Tech Stack: Laravel

Link :- <https://n2rtech.com/item/gisa>

- Lead, Quotation generation based on coverage type, duration, and risk profile.
- Policy renewal management with automated reminders and status updates.
- Integrated role and permission based access and user authentication

Opencart Project

Plugin/Extension on which I worked on

https://www.opencart.com/index.php?route=marketplace/extension&filter_member=n2rtechnologies

Live Store

Electrihub is multi-store site deals with electrical equipment.

<https://electrihub.ca/>
